A good fit for every patient

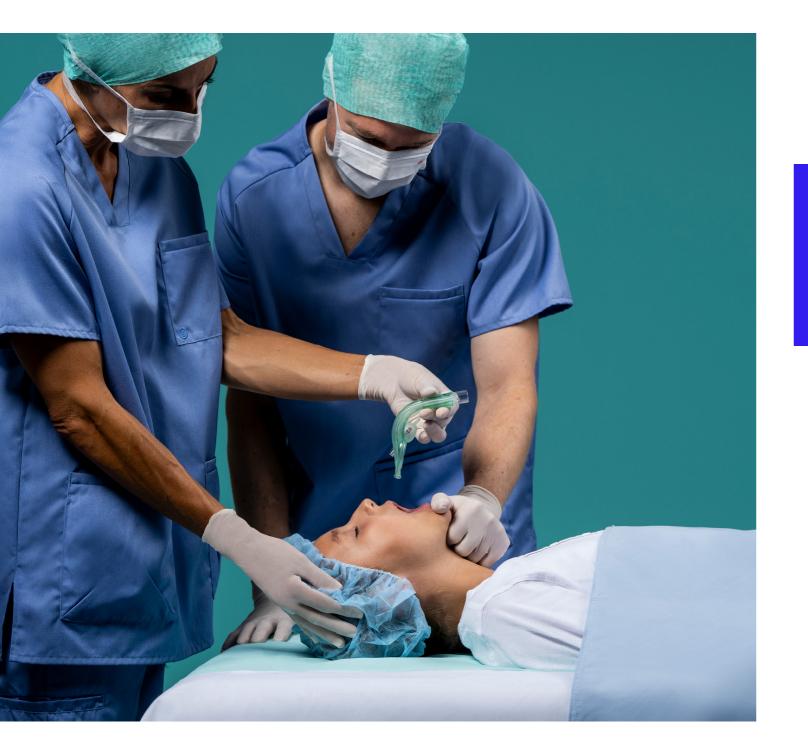

A reliable option for every emergency

A quality solution for every clinical situation

Ambu[®] Laryngeal Masks **QUALITY FOR EVERY CLINICAL SITUATION**

The Ambu[®] Aura[™] portfolio is a range of single-use disposable laryngeal masks, which are available in a wide array of product variants for a variety of clinical requirements and user preferences.

Suitable for both routine and emergency use, fast insertion times and high seal pressures enable you to establish a patent airway through which the patient may be ventilated. The soft, thin inflatable cuff enables you to obtain a seal with low cuff pressure that adapts to the shape of the airway anatomy.

Ambu[®] AuraGain[™]

The Ambu AuraGain is a second generation supraglottic airway that is suitable for use in; routine anaesthesia, difficult airways as a rescue device and/or a conduit for intubation, and also in resuscitation. The Ambu AuraGain is available in a complete range of 8 sizes, for use on infant, paediatric and adult patients.

FEATURES AND BENEFITS

- Large gastric channel for easy gastric tube insertion
- Designed with the original anatomical curve
- Thin and soft inflatable cuff
- Bite absorption area that protects against occlusion
- Large flat backplate for additional stability when positioned
- Navigation markings for flexible scope guidance
- Specific low-volume connectors for sizes 1 and 1.5 designed to reduce deadspace

Thin and soft inflatable cuff

- Large gastric channel
- Bite absorption area

408600000	6	Ambu AuraGain size 6	>100kg	16FR	8.0mm		10

CLINICAL FACTORS

- Second generation supraglottic airway with easy gastric tube placement, high seal pressures (documented up to 40cmH2O) and fast insertion times
- Can establish a seal with low cuff pressure that conforms to the anatomy and minimises soft tissue trauma
- Can be used as a conduit for intubation, assisted by a flexible scope
- MR Safe

Ambu[®] AuraOnce[™]

The Ambu AuraOnce is the original anatomically curved laryngeal mask, designed to replicate the natural curve of the airway anatomy. It is suitable for use in anaesthesia as well as in emergency medicine. It is available in a full range of 8 sizes.

FEATURES AND BENEFITS

- The original anatomically curved laryngeal mask airway
- Cuff design prevents backfolding
- High seal pressures and fast insertion times
- MR Safe

Ambu[®] Aura-i[™]

The Aura-i is a laryngeal mask that is also suitable for use as a conduit for intubation. Featuring helpful navigation marks for flexible scopes, the Aura-i is ideal for use in difficult airway cases and can't intubate-can't ventilate scenarios as an airway rescue device. It is available in a full range of 8 sizes.

FEATURES AND BENEFITS

- Suitable for use as a conduit for intubation
- Bite-resistance connector shell prevents occlusions
- Designed with the original anatomical curve
- Cuff design prevents backfolding
- MR Safe

Ambu[®] AuraFlex[™]

The AuraFlex is a flexible laryngeal mask airway suited for use in ENT, opthalmic, dental and other head and neck procedures. The high flexibility of the airway tube allows for it to be positioned away from the surgical site, facilitating access without impacting ventilation. The AuraFlex is available in six sizes, ranging from 2-6.

FEATURES AND BENEFITS

- Flexible airway tube enables positioning away from the surgical site
- Kink-free wire reinforced airway tube prevents tube occlusions
- Cuff design prevents tip backfolding
- MR Unsafe

Ambu[®] AuraStraight[™]

The AuraStraight is a straight laryngeal mask airway able to deliver high seal pressures with a low cuff volume. It can be used in a variety of clinical environments, including anaesthesia, emergency medicine and resuscitation. The AuraStraight is available in a full range of 8 sizes.

FEATURES AND BENEFITS

- Straight laryngeal mask airway
- Cuff design prevents tip backfolding
- MR Safe

Ambu[®] Resuscitators

A RELIABLE OPTION FOR EVERY EMERGENCY

In 1956, the original Ambu bag developed by Holger Hesse and Dr Henning Reuben was released. It quickly became a dependable standard at hospitals and emergency service facilities. Since then, resuscitators have remained at the core of Ambu's product portfolio.

Building on over 65 years of resuscitator innovation, Ambu continues to offer a range of products designed to meet your needs for appropriate patient ventilation.

Ambu[®] SPUR[®] II

Ambu's history of resuscitator innovation stretches back over 65 years to the release of the original Ambu bag. Today, the SPUR II represents Ambu's latest development in resuscitators. Available in three sizes, and numerous configurations, the SPUR II is offered in a complete family of single-use products that cover all patient ranges.

FEATURES AND BENEFITS

- Integrated handle and SafeGrip surface for improved handling
- Single-shutter valve system with proven reliability
- Thin SEBS self-inflating bag with excellent recoil
- Swivel between valve and mask permits 360° rotation of the resuscitator
- M-port to monitor etCO2 or provide medication
- Splashguard to direct patient exhalation and fluids away from user
- Pressure limiting valve to prevent delivery of excessive pressure
- Override clip to allow for higher pressures to be obtained, if needed

Integrated handle, SafeGrip surface and TPE compression bag

Pressure limiting valve and override clip

Swivel connector

Splashguard

and m-port

CLINICAL FACTORS

- Low-weight disposable resuscitator
- Capable of supplying 100% FIO2 when used with an oxygen source
- Transparent housing provides view of valve operation
- Adult and paediatric sizes can be compressed for easier storage
- Compatible with Ambu PEEP valves and manometer
- MR Conditional

Ambu[®] Oval Plus

The Oval Plus is a reusable resuscitator that is available in a full size range designed for manual ventilation of neonates through to adults. The product can be sterilized up to 30 times at a temperature of 134°C/273.2F, however the O2 reservoir bag can only be sterilized for a total of 15 times. The oxygen reservoir tube is suitable for manual cleaning and chemical disinfection only.

FEATURES AND BENEFITS

- Single shutter valve system with proven reliability
- Pressure relief valve to prevent delivery of excessive pressure
- MR Conditional
- Reusable, and can be sterilized at 134°C/273.2F (except oxygen reservoir tube)

Ambu[®] Mark IV

The Mark IV is a reusable resuscitator designed for manual ventilation of adults and children, it is available in two sizes; size Adult and size Baby. The product can be sterilized up to 30 times at a temperature of 134°C/273.2F, however the O2 reservoir bag can only be sterilized for a total of 15 times. The oxygen reservoir tube is suitable for manual cleaning and chemical disinfection only.

FEATURES AND BENEFITS

- Single shutter valve system with proven reliability
- Built in pressure relief valve system on the size baby to prevent delivery of excessive pressure
- MR Conditional
- Reusable, and can be sterilized at 134°C/273.2F (except oxygen reservoir tube)

Ambu[®] Face Masks A GOOD FIT FOR EVERY PATIENT

Ambu offers a wide range of both disposable and reusable face masks, as well as a variety of cuff types. They are suitable for a multitude of clinical applications and are also available in an assortment of sizes to ensure that all patient needs can be met.

AMBU[®] FACE MASK PORTFOLIO

- King Mask, a disposable anaesthetic face mask
- Disposable Face Mask, available with and without a check valve
- Disposable Open Cuff Face Mask, a product with an open cuff seal opposed to an inflatable cushion
- Silicone Face Mask, a reusable product with a selfinflating cuff
- Open Cuff Silicone Face Mask, a reusable product with an open cuff opposed to an inflatable cushion

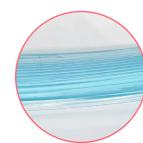

Ambu[®] King Mask

The Ambu King Mask is an anatomically shaped, disposable anaesthetic facemask that is designed to support a tight seal around the facial anatomy with minimal pressure to the face. Available in seven sizes, with or without hook rings, and also in scented variations, the King Mask range can be used for infant, paediatric and adult patients.

FEATURES AND BENEFITS

- Ribbed cushion edge, for improved grip
- Anatomically shaped for improved adjustment to the face
- Clear dome for observation of the patient's condition
- Check valve which allows for inflation or deflation of the cushion to enhance the seal
- Scented mask variations are available which can have a calming effect especially for children

- MR Conditional

ORDERING SPECIFICATION

Item No.	Description		Min order quantity
322003000	Ambu disposable pressure manometer	180	15

Ambu[®] Reusable PEEP 10 and 20 Valves

FEATURES AND BENEFITS

- Adjustable to allow for varying levels of PEEP to be applied
- Reusable
- Suitable for reprocessing up to 30 times
- MR Unsafe

Item No.	Description	Box quantity	Min order quantity
A000137000	Ambu Reusable PEEP 10 Valve with ID Ø30mm inlet connector	40	1
A137001000	Ambu Reusable PEEP 10 Valve with 2 inlet connectors ID Ø30mm and OD Ø22mm	40	1
A000138000	Ambu Reusable PEEP 10 Valve with OD Ø22mm inlet connector	40	1
A000177000	Ambu Reusable PEEP 20 Valve with OD Ø22mm inlet connector	40	1
A000213000	Ambu Reusable PEEP 20 Valve with ID Ø30mm inlet connector	40	1

WE ACKNOWLEDGE OUR **ENVIRONMENTAL RESPONSIBILITY**

JOIN THE CIRCLE WITH AMBU

Along with our customers, we have embarked on a sustainability journey, which is dynamic and ongoing. We aim to apply the principles of the circular economy to how we design, manufacture and dispose of our medical device solutions. This enables us to continuously seek new ways to minimise waste and recycle and reuse materials.

FOCUS AREAS WITHIN PRODUCT AND DESIGN

HEALTHY SUBSTANCES

Refuse harmful substances when choosing

USE MORE SUSTAINABLE RAW MATERIAL, SUCH AS BIOPLASTICS

chemically recycled content) in our products.

CIRCULAR PRODUCTS DESIGN

Redefine the product structure to enable recycling by design and strive to keep

CIRCULAR PACKAGING AND LOGISTICS

Rethink packaging and the way we ship our

MANUFACTURING CASCADES

and water from side streams of our processes to make more from less through cascaded use.

SYSTEM INNOVATION

Reconfigure health and waste system through pilots and partnerships to achieve

DECREASING THE AMOUNT OF PACKAGING MATERIAL VIA DESIGN INNOVATIONS

Minimal waste, maximum protection

The pouches and cuff protectors of Ambu laryngeal masks are designed to ensure that

New packaging design lowers our carbon footprint

Our Circular Design Guide provides us with a methodology for incorporating a circular

In the case of the packaging for Ambu[®] Aura™ laryngeal masks, it has helped us to:

0 used in previous versions across sizes \mathbf{O}

USING MORE SUSTAINABLE RAW MATERIAL, SUCH AS BIOPLASTICS

100% bioplastic raw material * in Aura laryngeal masks cuff protectors fossil-based HDPE plastic. This raw material is bio-based second-generation feedstock that:

- Reduces our use of fossil-based virgin plastics
- Emits 65% less CO₂e compared to purely fossil-based HDPE plastic**
- Does not compete with food production or agriculture (sourced from food waste and by-products, like used cooking oil)

A HISTORY OF BREAKTHROUGH IDEAS

Ambu has been bringing the solutions of the future to life since 1937. Today, millions of patients and healthcare professionals worldwide depend on the efficiency, safety and performance of our single-use endoscopy, anaesthesia, and patient monitoring solutions.

The manifestations of our efforts have ranged from early innovations like the Ambu[®] Bag[™] resuscitator and the Ambu[®] BlueSensor[™] electrodes to our newest landmark solutions like the Ambu[®] aScope[™] - the world's first singleuse flexible endoscope. Moreover, we continuously look to the future with a commitment to deliver innovative quality products that have a positive impact on your work.

Headquartered near Copenhagen in Denmark, Ambu employs approximately 4500+ people in Europe, North America and the Asia Pacific.

Rethinking medical solutions; respecting the environment

At Ambu, we aim to create solutions that not only improve healthcare for professionals and their patients, but also have the lowest environmental footprint possible.

We continuously invest in the research and development of technologies and materials that lower the environmental footprint of our products, and by extension, your hospital's environmental impact.
