

# Ambu® aScope BronchoSampler™

Breakthrough, closed loop sampling

## Key Benefits

- Reduced risk of sample loss
- Single operator sampling solution
- Vacuum bypass to eliminate suction tube switch

Streamline procedures and protect samples with aScope BronchoSampler™, a fully-integrated, closed-loop solution only for aScope™ 4 Broncho.

### Simplified sampling process

A one-of-a-kind, purpose-built system, the aScope BronchoSampler™ improves workflow efficiency by allowing a single clinician to easily perform bronchoscopic sampling as part of BAL or BW procedures – from system assembly to sample procurement. aScope BronchoSampler™ also features a vacuum bypass that further simplifies procedures by enabling you to change between suction and sampling without a suction tube switch.

### Fewer lost and contaminated samples

As a single-use, sterile, closed-loop system, aScope BronchoSampler™ reduces the risk of sample loss and guarantees sample quality from start to finish. By minimising the risk of sample contamination or exposure, aScope BronchoSampler™ supports representative sampling and timely diagnostics as well as the safety of both patients and clinicians.

### Innovative, integrated system

Purpose-built sampling solution for aScope™ 4 Broncho, that is ready when you are and comes with all critical sampling components for BAL and BW procedures.

# Specifications

Suction Connector <sup>1</sup>	Specification
Connecting tube with female interface	ID = $\varnothing 7 \pm 1$ mm
Connecting tube with male interface. Applicable when suction adapter is used.	OD = $\varnothing 7 \pm 1$ mm

1. Please check for compatibility with suction tubing before use

Sample Container	Specification
Sample Container volume	30 ml
Storage and transportation	Specification
Storage and transportation temperature	10-40° C (50-104 ° F)
Operating environment	Specification
Temperature	10-40° C (50-104 ° F)
Sterilisation	Specification
Method of sterilisation	ETO

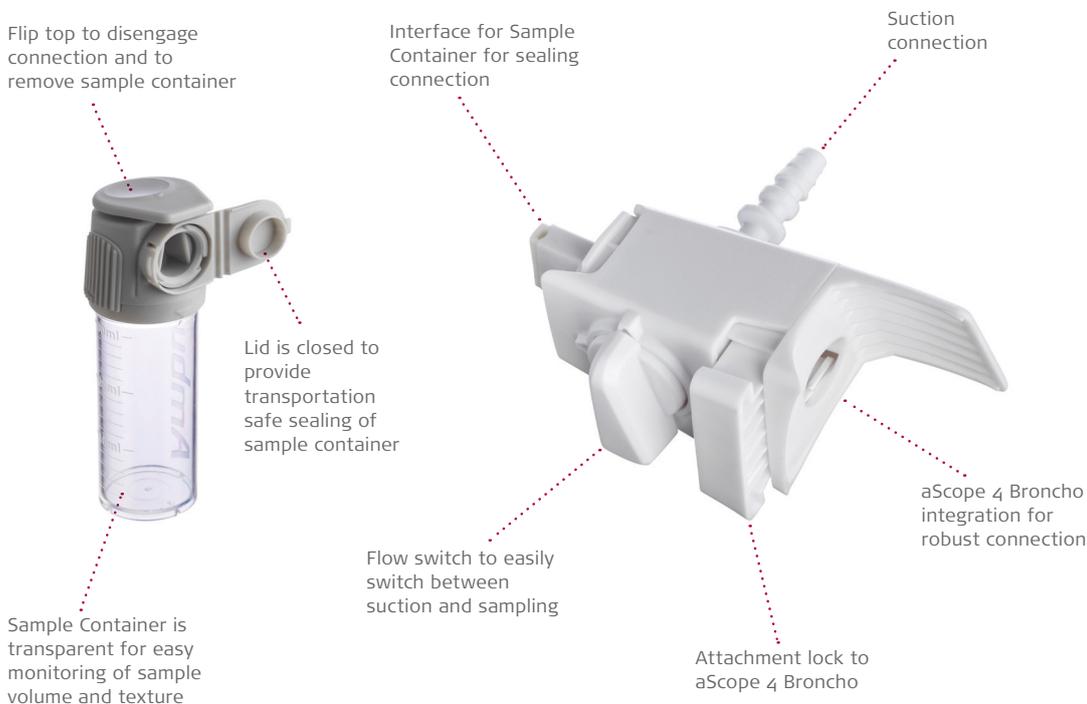

Switch from suctioning to sampling by the flip of a switch

# Ordering specifications

Item no.	Quantity
480200000 aScope BronchoSampler™, specimen sampling system	5
480300000 aScope BronchoSampler™ SC, sample container	10

Easily close lid to seal retrieved sample

Suction adapter for connection of male style suction tube
